MEAT ANIMALS - FARM PRODUCTION, DISPOSITION AND INCOME,
BY STATES, 1954 AND 1955

Farm production of meat animals in 1955 totaled 50.0 billion pounds, 5 percent more than the 47.4 billion pounds produced in 1954, according to the Crop Reporting Board. This is the highest production of record. Production of cattle and calves in 1955 was an all time high. Sheep and lamb and hog production was also higher than in 1954. Cattle and calf production amounted to 57 percent of the total farm production of meat animals in 1955, with hogs furnishing 40 percent and the remaining 3 percent coming from sheep and lambs. In 1954, cattle and calves represented 58 percent of the total; hogs 39 percent; and sheep and lambs, 3 percent.

Gross income (cash receipts plus value of home consumption) from meat animals amounted to 8.5 billion dollars in 1955, 8 percent less than the 9.3 billion dollar income in 1954. The gross income in 1955 for cattle was above that of a year earlier but lower for hogs and sheep and lambs. The increase in gross income for cattle was due to larger marketings and a higher price for calves. While for hogs and sheep and lambs the decrease was due to lower prices, since marketings were larger. Cash receipts for farm marketings totaled 8.2 billion dollars, 8 percent below the 8.9 billion received in 1954.

Cattle and calves: Production of cattle and calves in 1955 was 28.4 billion pounds, compared with 27.6 billion pounds produced in the preceding year. The increase in production was the result of a record high calf crop. Gross income from cattle and calves amounted to 5.3 billion dollars, 2 percent more than the 5.2 billion dollars in 1954. Cash receipts totaled 5.2 billion dollars, about 79 million dollars more than in 1954. The average price per 100 pounds live weight received by producers in 1955 was \$15.60 for cattle and \$16.70 for calves. This was 40 cents per hundred pounds less than in 1954 for cattle, but 20 cents per hundred pounds more for calves.

Hogs: The production of hogs in 1955 totaled 20.0 billion pounds, 10 percent above the 18.2 billion pounds produced in 1954, but 21 percent below the record production of 25.4 billion pounds produced in 1943. Gross income from hogs at 2.9 billion dollars was 23 percent smaller than the 3.8 billion dollars income in 1954. Cash receipts of 2.7 billion dollars were 22 percent less than the preceding year. In 1955, the average price per hundred pounds was \$15.00 compared with \$21.60 in 1954 and the record of \$24.10 in 1947.

Sheep and lambs: The estimated production of sheep and lambs in 1955 amounted to 1.6 billion pounds, only 5 million pounds more than was produced in 1954. The record production was 2.3 billion pounds produced in 1942. Gross income from sheep and lambs was 319 million dollars compared with 328 million in 1954. Cash receipts of 316 million dollars were 3 percent smaller than the preceding year. In 1955, sheep sold for an average of \$5.87 per hundred pounds live weight and lambs at \$18.40. In 1954, the selling price of sheep was \$6.10 and lambs \$19.10.

^{1/} Balance sheet estimates. Total of marketings, farm slaughter, deaths and on hand end of year equals total of calf crop, inshipments, and on hand beginning of year.

^{2/} Not strictly a calving rate. Figure represents calves born expressed as percentage of the January 1 inventory of cows and heifers 2 years old and over on January 1 and not the number of all cows and heifers giving birth to calves during the year.

^{3/} Excludes interfarm sales.

^{1/} Balance sheet estimates. Total of marketings, farm slaughter, deaths and on hand end of year equals total of calf crop, inshipments, and on hand beginning of year.

^{2/} Not strictly a calving rate. Figure represents calves born expressed as percentage of the January 1 inventory of cows and heifers 2 years old and over on January 1 and not the number of all cows and heifers giving birth to calves during the year.

^{3/} Excludes interfarm sales.
